

Anti-Vibration Table

IVFtech

For ICSI procedures

IVFtechs anti-vibration tables are designed to meet the requirements for all available models of inverted microscopes.

Surface:

Part no.2504020

The surface of the table is Hi-MACS which is natural minerals blended with pure acrylic resin to form a solid durable material. Still, it can be shaped to meet virtually any design requirements.

Furthermore, it is easy to clean, hygienic and does not absorb liquids or odours. Clean with soapy water or use an abrasive cleanser and a green Scotch-Brite pad.

The anti-vib consist of 4 rubber cushions, with a marbel stone on top.

Standard size: LxDxH 1150mm x 72mm x 79-83mm
